

Poster Paper Prizes : 2001 to 2008

The Main Award consists of a cheque for £100, Certificate, Software and Books. The Merit Award consists of a cheque for £25, Certificate, Software and Books.

RSPSoc2001

Main Award - Francis Taylor (University of Edinburgh) for: "Remote Sensing of Water Leaks from Rural Aquaducts". Merit Award - Charles George (CEH, Monks Wood) for: "Combining multi-temporal CASI images with indicator species phenology to differentiate chalk grassland types on Salisbury plain (UK)".

There was no Annual Conference as such in 2002 but an autumn meeting on "Digital Imagery Data Standards" at the DTI Conference Centre on 22 October 2002. Therefore, there were no Poster Prize awards made.

RSPSoc2003

Main Award: "Designing a fuzzy rule-based pattern recognition system for tropical cyclone storm canopy characteristics", F Khalid, C Power and E Shebab, University of Greenwich, UK. Merit Award: "Estimating spectral irradiance from measurements in seven spectral bands", E M Rollin and E J Milton, University of Southampton, UK.

RSPSoc2004

Main Award: "Forest fires in Central Siberia and their impact on emissions of greenhouse gases", H Balzter, C George, C Rowland, F Gerard, I McCallum, A Shvidenko and C Schnullius C, (Centre for Ecology and Hydrology, UK)
Merit Award: "The relationship between the spectral and spatial dynamics of wetland vegetation", C O'Shea, S J Wintertottom and N J Willby (University of Stirling)

RSPSoc2005

Main Award: "InSAR measurements of volcanic deformation at Etna -forward modelling of atmospheric errors for interferogram correction, R Holley, G Wadge and M Zhu (ESSC, University of Reading)
Merit Award: "A multi-sensor approach for desertification monitoring in the coastal areas of Vietnam, V A Hoang, M Williams and D Manning (University of Newcastle)

RSPSoc2006

Main Award: "What does a Spectroradiometer See", A A MacArthur, C MacLellan and T J Malthus. (School of Geosciences, University of Edinburgh; NERC, Field Spectroscopy Facility, University of Edinburgh).
Merit Award: "Rule-based Improvement of Maximum Likelihood Classified LIDAR Data Fusing Co-registered Bands", M Bartels and H Wei (University of Reading).
Merit Award: "Mapping the proportion of c3 and c4 grasses in South Dakota", G M Foody and J Dash (University of Southampton).

RSPSoc2007

Main Award: Integrated Remote Monitoring of Coastal Geohazards, PE Miller, JP Mills, SJ Edwards, P Bryan, S Marsh, P Hobbs (Newcastle University)

Merit Award: Laboratory spectro-radiometric prediction of peat decomposition: comparison of transmission, lignin-cellulose and other biochemical Indices, A Alroichdi, J McMorrow and M Evans (University of Manchester)

RSPSoc2008

Main Award: Land-use change impacts on food security using the FEEDME model and satellite data, Anita Perryman

Merit Award: Modelling hydrological effects of the Israeli Government's "separation barrier" using GIS and remote sensing techniques, Adrian Nowell

Merit Award: Exploring the impact of skylight effects on reflectance factors, Karen Anderson
