

Presentations and Open Forum:

New sensors and perspectives in Data Policy

Thursday 12th June, 2008, 09.30-16.15
BERR Conference Centre, 1 Victoria Street, London

First Announcement

The last twelve months has seen the launch of a number of new satellites and the advent of EO data sources that will need to underpin GMES services pre-Sentinels. This workshop presents an opportunity to consider the merits of these new satellites, their contribution to the expansion of the EO value added services portfolio and whether the data policy meets the breadth of needs of traditional users both commercial and scientific as well as the emerging GMES User.

Provisional programme

Time	Presentation
9.00am	REGISTRATION & COFFEE
9.30am	INTRODUCTIONS
9.40am	Radarsat-2 : A new mission & new operator & data policy
10.00am	TerraSAR-X : new application opportunities and data policy
10.20am	Formosat-2 : High resolution & daily revisit
10.40am	WorldView-1 & -2 Latest status on both missions
11.00am	COFFEE
11.30am	DMC : Data & Data Policy
11.50am	COSMO-SkyMed 1
12.10pm	DISCUSSION – What do the missions bring? What data policies are needed to complement the opportunities?
12.30 pm	LUNCH
1.45pm	GMES Projects – Data Access in Practice
2.05pm	Data Policy : the UK Government perspective
2.25pm	Data policy issues
2.45pm	TEA
3.05pm	Data Policy –UK and International Security Perspective
3.25pm	Data Users: Scientific Perspectives
3.45pm	DISCUSSION
4.15pm	CONFERENCE CLOSE

You are invited to register for this BARSC-organised event, which will bring together an audience from the public and private sectors with a common interest in getting the most from today's leading research and development in the remote sensing arena.

Attendance at the workshop is free, including lunch, but you must register in advance in order to gain entry to the DTI Conference Centre. To register, please send an email with the subject 'BARSC Workshop 2008' to workshop@barsc.org.uk, containing your name, affiliation and contact details.
